To obtain services:

1. Employee must request a vision care benefit (claim) form **IN ADVANCE** of the scheduled appointment (recommend at least 1 week). Three options:
 - **CALL** 800-432-4966 to make the request with a customer service representative. VBA will verify eligibility and send benefit form (claim form) and current doctors' list to the employee
 - **ACCESS THE WEB SITE** (see above) and request a form using the online features
 - **If the provider is set up to submit claims to VBA electronically, make the request directly with that provider**
2. Employee presents benefit (claim) form at time of first visit.
3. Doctor orders prescription from VBA approved lab, verifies accuracy and dispenses RX to employee
4. VBA pays doctor for professional services
